HOSPICE SERVICES

Triage Telephone Support

The triage service is provided during the hours of 9.00 – 17.00 each week day. It is the first point of contact from the hospice to patients who have been referred for the triage service or for community palliative care. On receipt of all community referrals a CNS from the triage service will assess for specialist palliative care needs, offer advice and support and then decide which service is appropriate to most meet those needs. Patients who do not require a regular visit from our community palliative care team, but have concerns related to their illness, find our “triage telephone support service” very helpful. This service extends to residents of Barking & Dagenham, Havering and Brentwood.

Community Palliative Care Service

The community palliative care team supports people in the community by providing specialist advice, working in close liaison with a patient’s own doctor, district nursing team and other health and social care providers. They provide support for the whole family enabling more patients to remain at home if that is their wish. This service extends to residents of Barking & Dagenham, Havering and Brentwood.

Hospice at Home Service

This team of trained nurses and health care assistants provides care for patients at home in the last 2-3 weeks of life. They work closely with the triage service, community palliative care team, district nurses, Marie Curie carers and social care teams to provide extra professional home support at a critical time. The service extends to residents of Barking & Dagenham, Havering and Brentwood.

Day Hospice Service

The day hospice unit is an integral part of our specialist palliative care service, enabling patients to access the hospice and specialist palliative care teams during regular weekly or fortnightly visits whilst continuing to live at home. With the support of a complex multi-professional team it aims to enhance the independence and quality of life of patients by responding to their physical, psychological, social and spiritual needs. This service extends to residents of Barking & Dagenham, Havering, Brentwood, Redbridge, and local West Essex.

Inpatient Unit Service

The inpatient unit offers specialist palliative care for those patients with the most complex needs associated with any life limiting illness. Admissions can be for assessment, control of symptoms, rehabilitation and end of life care. The key aim is to help patients to get on with living – almost half of all admissions lead to patients returning home. We are unable to provide long term inpatient care, however we would support anyone for whom long term care is required by exploring future care options with them. This service extends to residents of Barking & Dagenham, Havering, Brentwood, Redbridge and West Essex.
